The Best Tech, Tools, and Teams, All in One Place

BoldTrail BackOffice has everything you need to skyrocket ROI, boost productivity, and fuel growth in one seamless ecosystem

Handle every back office task from accounting to transaction management and reporting, in **one complete system**, seamlessly integrated with the BoldTrail CRM, so you can bring your team, tools, and data together.

Transaction Management

Keep every deal on track, and simplify forms, signatures, and compliance with built-in workflows that keep everything moving forward.

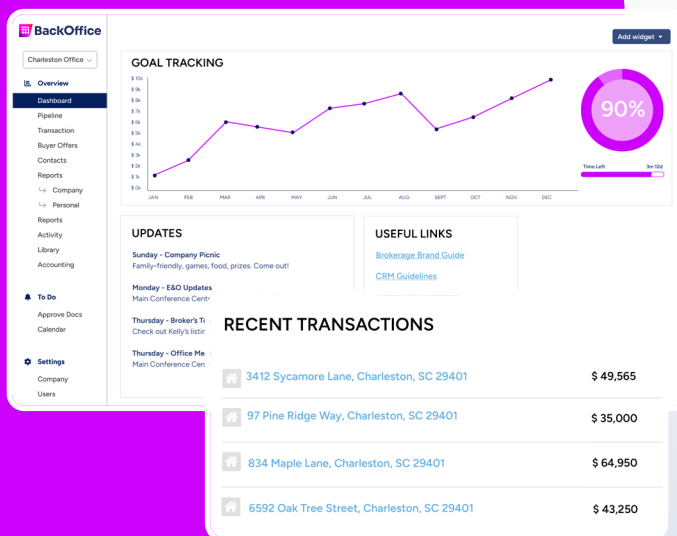

- Standardize transaction checklists to reduce errors and delays.
- Provide brokers and admins full visibility into progress and compliance.
- Empower agents with one place to manage forms, signatures, and tasks

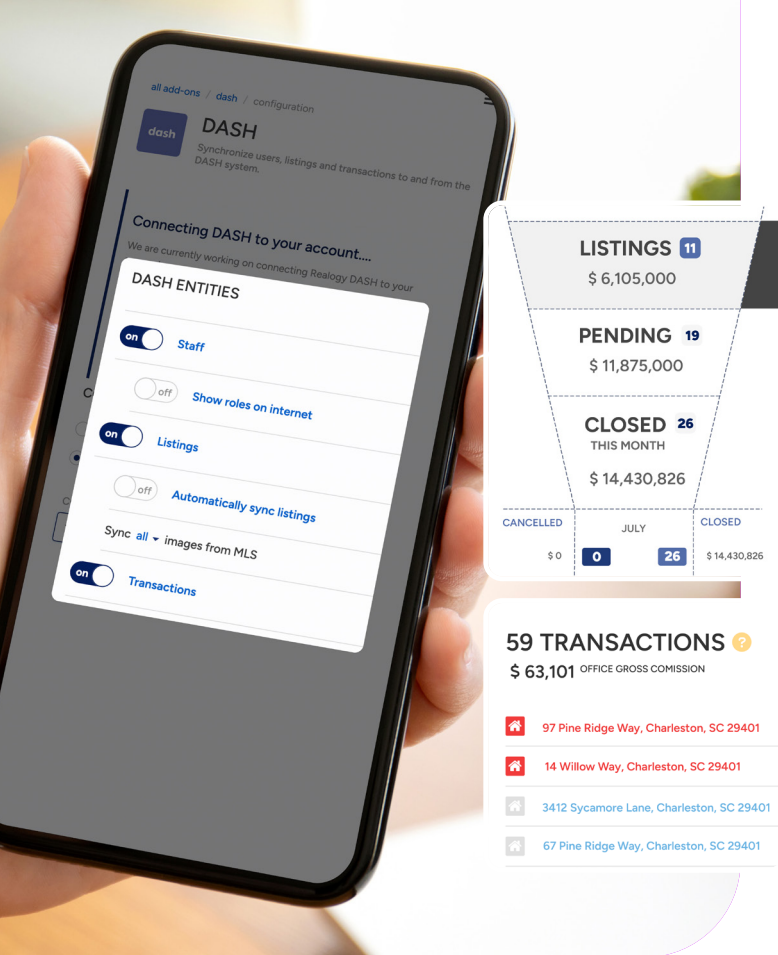

Commissions & Compliance

Pay agents accurately, every time, and automate even the most complex commission structures.

- Configure multi-tier splits, caps, and bonuses without manual work.
- Eliminate payout errors that damage trust with agents.
- Give brokers and finance teams real-time visibility into commission pipelines.

Real Estate Accounting + QuickBooks

Seamlessly tie transactions, commissions, and expenses into your back office accounting.

- Integrate directly with QuickBooks to simplify reconciliation.
- Manage trust accounts, escrow, and payments in one system.
- Deliver real-time financial reporting to drive smarter decisions.

Agent Roster & Onboarding

Easily onboard new agents, track licensing, and manage rosters at scale, so your back office can keep up with your business growth.

- Digitally onboard agents with compliance-ready forms.
- Keep licensing, splits, and status updated in one central system.
- Scale from 20 to 2,000 agents with consistent workflows.

BoldTrail BackOffice is the next generation of Brokermint, and part of the **Inside Real Estate portfolio of solutions**, delivering one cohesive ecosystem to power and streamline your workflow, and drive maximum productivity.

Bring your entire business together and drive **scalable growth** with BoldTrail BackOffice.
