> "My personal favorite feature of BoldTrail is the BackOffice integration. This saves time by eliminating the need for duplicate entry and increases accuracy by removing the opportunity for "human error." **Agents use BoldTrail as the source of truth for all contact data.** BoldTrail then feeds the back office and makes starting a transaction and sending for signature a breeze! The uniformity of all the different Inside Real Estate solutions under one umbrella not only simplifies things for our admin team, but for our agents – which in turn increases agent adoption and maximizes software utilization."
